March 15, 2010

ATCO MIDSTREAM & SASKENERGY EXPAND GAS PROCESSING IN SE SASKATCHEWAN

Expansion creates environmental benefits

CALGARY, Alberta – ATCO Midstream and SaskEnergy Inc. today announced the completion of an expansion project at the Kisbey Gas Plant in southeastern Saskatchewan that will benefit both the environment and Saskatchewan's economy.

The \$44 million project, funded jointly by SaskEnergy's Bayhurst Energy Services Corporation (BESCO) and ATCO Midstream, triples the capacity of the Kisbey Gas Plant to five million cubic feet of gas per day. It also extends the current gathering system at the plant, which was purchased by the two companies under a joint venture agreement in 2007.

"SaskEnergy's 50 years of natural gas experience contributed to this project, which will benefit our province, our economy and the environment," said Ken Cheveldayoff, Minister Responsible for SaskEnergy. "It is an excellent example of how the Saskatchewan Government is working to grow investment through Crown and private sector partnerships."

Increased oil production in the area created additional gas volumes that were being flared to the atmosphere. The expansion captures excess gas volumes, reducing greenhouse gas emissions while providing an added revenue stream back to oil producers. At its new capacity, the Kisbey Gas Plant is capable of removing as much as 131,000 tonnes of Greenhouse Gases (GHGs) from the atmosphere each year. That's equivalent to the emissions produced by more than 20,000 homes.

"The expansion of the Kisbey plant and gathering system provides a higher level of service to our customers, while at the same time conserving and upgrading a non-renewable energy source," said Kevin Cumming, President of ATCO Midstream. "It speaks to our ongoing commitment to the environment and provides ATCO Midstream with the opportunity to grow our business in the Kisbey area where we continue to operate in a safe and environmentally responsible manner."

ATCO Midstream is part of the ATCO Group of companies. ATCO Group, with more than 7,500 employees and assets of approximately \$10.0 billion, delivers service excellence and innovative business solutions worldwide with leading companies engaged in Utilities (pipelines, natural gas and electricity transmission and distribution), Energy (power generation, natural gas gathering, processing, storage and liquids extraction), Structures & Logistics (manufacturing, logistics and noise abatement) and Technologies (business systems solutions). More information on ATCO Midstream can be found at www.atcomidstream.com.

SaskEnergy Incorporated, a Crown Corporation, has been providing natural gas distribution, transmission and storage services to Saskatchewan for more than half a century. SaskEnergy delivers the benefits of safe, convenient and environmentally friendly natural gas to more than 347,000 residential, farm, commercial and industrial customers through its 80,000 kilometre distribution and transmission pipeline network.
